agricultural products

HERBS

iber-group

ABOUT OUR FARM

Herbs iber-group is an Egyptian export company specialized in supplying premium-quality agricultural products to European markets. We are committed to international quality standards, food safety regulations, and maintaining a reliable cold chain system from farm to destination.

Our mission is to deliver fresh, safe, and high-quality Egyptian agricultural products that meet European market expectations.

BASIC METHODS FOR BACKING OUR MOST IMPORTANT PRODUCTS

Fresh agricultural products use modern farming practices and careful cultivation. Our farm is dedicated to producing healthy, high-quality crops that meet international standards and reach our customers fresh and full of natural flavor

We specialize in all types of agricultural crops, and our most important products are:

SWEET POTATOES

ORANGES

POTATOES

BNANAES

STRAWBERRY

ARTICHOKES

POTATOES

CONTAINER LOADING TASKS OF POTATOES

Packaging Stage

Our potatoes are packaged in wooden or cardboard boxes, mesh bags, regular bags, or jumbo bags starting from 25 kg, depending on the customer's request. Product information includes:

- Country of origin
- Item
- NE. Weight
- Packing date

Plastic mesh bags – 10 kg

Usage: Local sale / Export to certain markets

Bag specifications:

Material: Plastic mesh

Net weight: 10 kg of potatoes

Number of bags per pallet:

Standard pallet: 120 × 100 cm

Per layer: 10 bags

Number of layers: 10 layers

✓ Total: 100 bags × 10 kg = 1,000 kg (1 ton)

Export Carton – 15 kg

Usage: Export to supermarkets and European markets

Carton specifications:

- Reinforced carton

- Ventilation holes

- Net weight: 15 kg

- Printed with company and product information

Number of cartons per pallet:

- Per layer: 6 cartons

- Number of layers: 8 layers

✓ Total: 48 cartons × 15 kg = 720 kg

Jumbo Bags (Big Bag) – 1200 kg

Usage: Bulk export / factories / storage

Jumbo Specifications

Material: Strong polypropylene

Net weight: 1,000 – 1,200 kg (depending on request)

Container

✦ A 40-foot container can carry approximately:

18 to 20 jumbo bags

Approximate total weight: 22 – 24 tons

HERBS IBER-GROUP

BANANAIES

1) Corrugated Cardboard Banana Boxes

Standard export carton boxes made of strong kraft board, with ventilation holes — used to pack bunches of bananas safely before palletizing. These boxes are often **13–18 kg/net** each for export markets.

2) Carton Liner Bags (Banana Carton Liners)

These are PE perforated liner bags placed inside the banana box to protect the fruit from dirt, help regulate humidity, and allow controlled air/ethylene gas movement during transit.

3) Palletized Stacks

After boxes are packed and lined, they are stacked on pallets for handling, storage, and loading into refrigerated containers. Export pallets often contain **48–54 banana boxes per pallet** depending on stacking configuration.

strawberries

🍓 First: Internal Packaging (Punnetts / Clamshells)

- ◆ 1) Transparent plastic containers (Clamshell) Material: Food-grade PET Common **weights: 250g, 400g, 500g** Equipped with ventilation holes that maintain the shape of the strawberries and prevent crushing
- ◆ 2) Open plastic containers (Punnetts) Used with wrapping film Excellent ventilation Lighter weight

🍓 Second: Absorption Pads to absorb moisture Placed under the container Reduce mold and quality loss

🍓 Third: Strawberry Export Cartons Used to arrange small containers Specifications: Reinforced moisture-resistant carton Side ventilation holes Printable (Company name – Weight – Country of origin) Common capacities: Carton contains: **8 × 250g = 2kg 10 × 400g = 4kg 12 × 500g = 6kg**

🍓 Fourth: Shipping Pallets Heat-treated wood (ISPM 15) Size: 120 × 100 cm Number of cartons per pallet: **60 – 80** cartons (depending on weight and height) Total weight: 500 – 700kg

Cooling chain (very essential)
Strawberries are one of the most sensitive crops

Ideal conditions:

- Temperature: 0 – 2 °C
- Humidity: 90 – 95%
- Immediate cooling after harvest (Pre-Cooling)
- Transport in refrigerated containers (Reefer)

Fastening and Packaging Tools

- Plastic shrink wrap
- Pallet straps
- Cardboard corner protectors
- Export data labels

HERBS IBER-GROUP

Artichoke

✓ 1) Cardboard Boxes

Strong corrugated cardboard boxes are used to bear the weight of the artichokes and the number of pieces. The artichokes are arranged inside the box so that they are neatly placed next to each other to reduce pressure and wear. Divider paper can be placed between the layers to protect the artichokes from pressure during transport (makes the contents more stable).

2) Mesh Bags

🍷 Mesh bags are plastic or mesh bags usually used for packing larger quantities for export (20–25 kg). The mesh allows the artichokes to breathe during transport and reduces moisture build-up inside the packaging. They are easy to carry and suitable for markets that require packing in plastic or mesh nets.
